

ADRIANO RUTZ

Pharmaceutical Scientist

Status: Postdoctoral Researcher, ETH Zürich

Field: Metabolomics, Mass Spectrometry, Natural Products

Languages: French (C2), English (C1), German (C1), Italian (C1)

website: <https://adafede.github.io>

phone: +41 76 521 45 40 - email: adriano.rutz@ik.me

address: Langgrütstrasse, 25, 8047 Zürich, Switzerland

Bio

Adriano Rutz is a postdoctoral researcher at ETH Zürich, where he develops computational and analytical methods for metabolomics. With a background in pharmaceutical sciences and phytochemistry, he combines mass spectrometry, cheminformatics, and open science to explore the chemical diversity of life. Following industry experience at Tradall SA (Bacardi Group), he completed his PhD at the University of Geneva. At ETH Zürich, he creates scalable, open-source tools for molecular annotation and metabolite discovery. He is a core contributor to the [LOTUS initiative](#), a global, [FAIR](#), community-driven knowledge base for natural products. His research fosters interdisciplinary collaboration across data science, chemistry, and biology, driving innovation in metabolomics and beyond.
